

SOFTWARE DEVELOPER

Salary commensurate with experience

Angel Solutions Limited is a software solutions business based in the Liverpool Science Park in the centre of the city. We work with both public and private sector clients though our main focus is the education sector. We are passionate about providing scalable database-driven .NET solutions that improve the education industry from school based software to national statistical information.

*We are looking for motivated developers with a **positive, hard-working attitude** to join our team.*

Key Skills:

- ASP.NET C# (2.0 or later)
- SQL Server (2005 or later)
- Strong object orientated programming skills with awareness of design patterns
- Experience of end to end software development lifecycle (*design, develop & test*)
- Good communications skills including requirements gathering, specification writing and working as part of a team
- 2 - 5 years relevant industry experience

Additional Useful Skills:

Core skills and attitude are more important for the right person but the following skills are noteworthy and useful:

- Relevant Microsoft qualifications
- HTML and CSS
- jQuery
- SQL Server Reporting Services
- Knowledge of the Education Sector
- Experience of working with large databases, including optimisation and scalability

If you're the right person for this opportunity please send your CV to recruitment@angelsolutions.co.uk
