

We believe in challenging the status quo and empowering the individual to change the world.

SIX WAYS BALANCE IS UNIQUE

Focuses on the **depth of understanding**

Involves the **children** in their **learning**

It **starts** and **ends** with the **learning**

Understands that **learning is not linear**

Can be used as a **Planning tool**

Supports **classroom practice**

“Balance is the servant and not the master”

Alan Brown (Oldfield Primary School)

Focus on the depth of understanding

No more bands, steps or hashtags! Balance provides you with a 1-9 learning wheel to help you assess a child's depth of understanding against lesson objectives. You can then secure the objective once you feel the child has fully mastered it.

Involve the children in their learning

Schools across the country are turning the learning wheel into classroom displays. This lets children discuss their learning, self-assess and know what they need to do next in order to deepen their understanding. This helps with growth mind-set and building a learning powered approach.

It starts and ends with the learning

As Sir Ken Robinson says "Learning is personal" and no two children have the same learning journey. Balance allows you to see each individual child's learning journey. You can clearly identify what children know and don't know.

Learning is not linear

We provide you with a default analysis trend line to get you started. As you develop your use of Balance, we help you to map your trend line against your scheme of work. The system then provides you with more accurate analysis on when you expect objectives to be secure.

Use Balance as a Planning tool

Balance shows you depth of understanding for individuals and whole classes to help you easily identify any gaps in learning and plan your next steps.

Supports classroom practice

Balance can be used within the classroom to support your AfL techniques, reduce marking and help you to give effective verbal feedback within a lesson.

"Unlike other tracking systems, Balance is underpinned by sound and well researched pedagogical principles."

Adam Vasco (St Vincent de Paul Catholic Primary)
