## Let's make sure no child falls behind.

Curriculum is at the heart of everything we do at schools, which is why it's so important for us to take our time, and get things *right* – especially *right* now.

That is why we have decided to offer Balance's curriculum tool to all primary schools, free of charge, during this time – so you can use it to get ahead of changes that will undoubtedly come, while we have the time to do so.

Created alongside subject specialists, schools and teachers across the country – Balance helps you focus on what matters most, allowing you to completely edit your curriculum in a way that works, going forward, for your primary school.

All of our children ought to be able to tell us what they are learning about and why it is important.

If they can't, we haven't taught them properly.

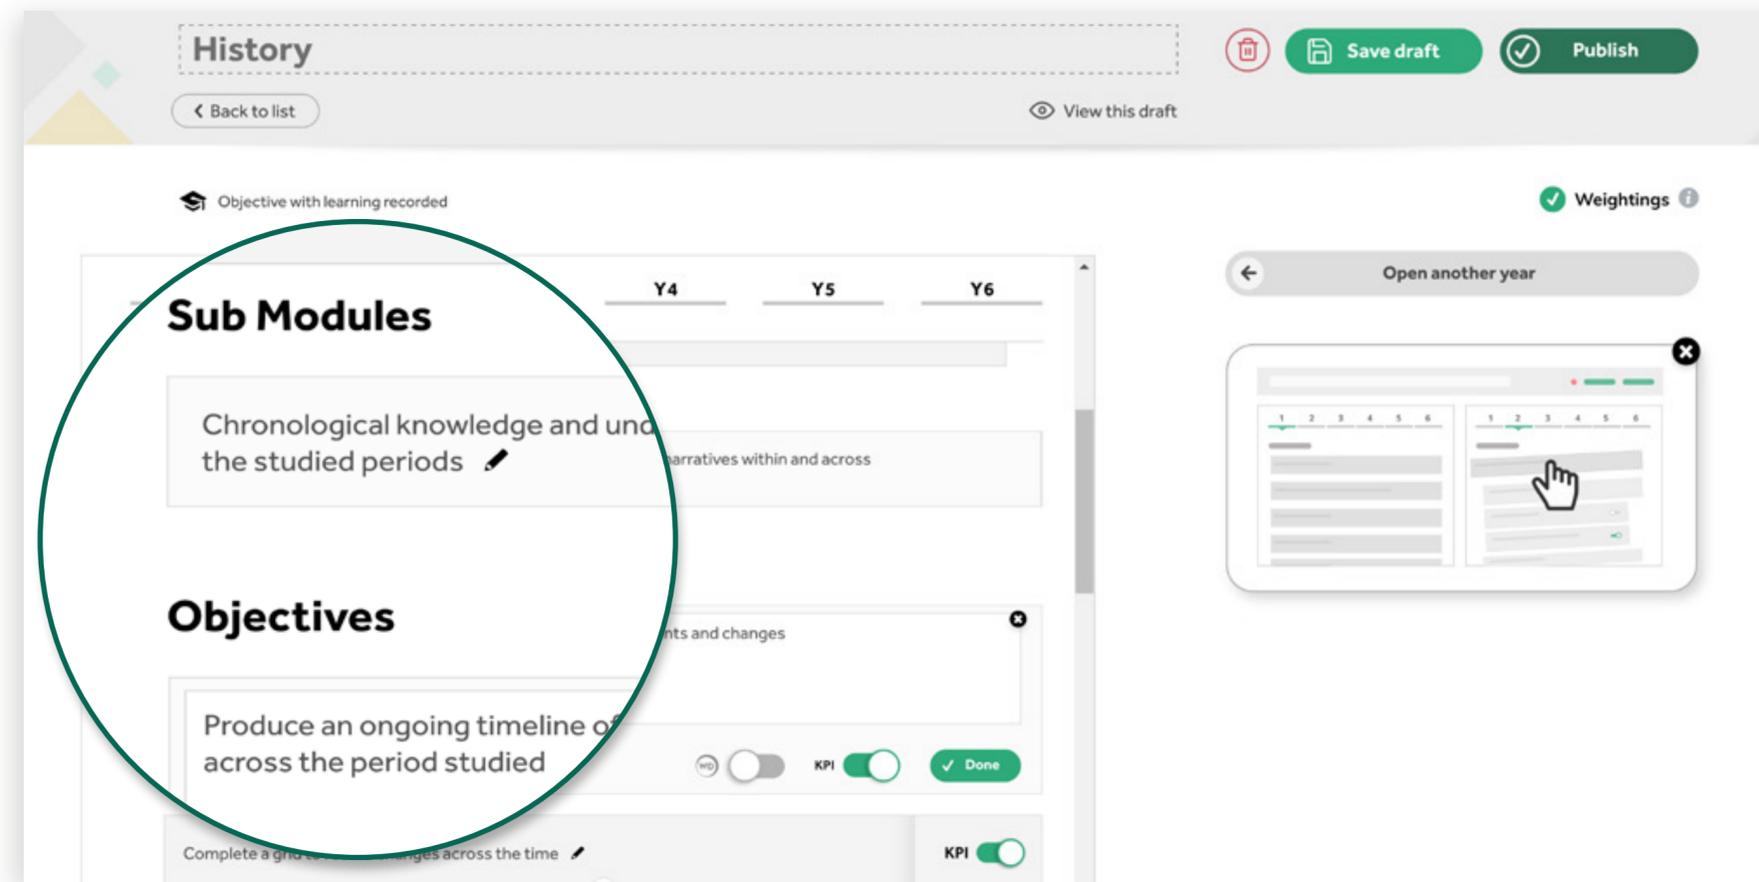

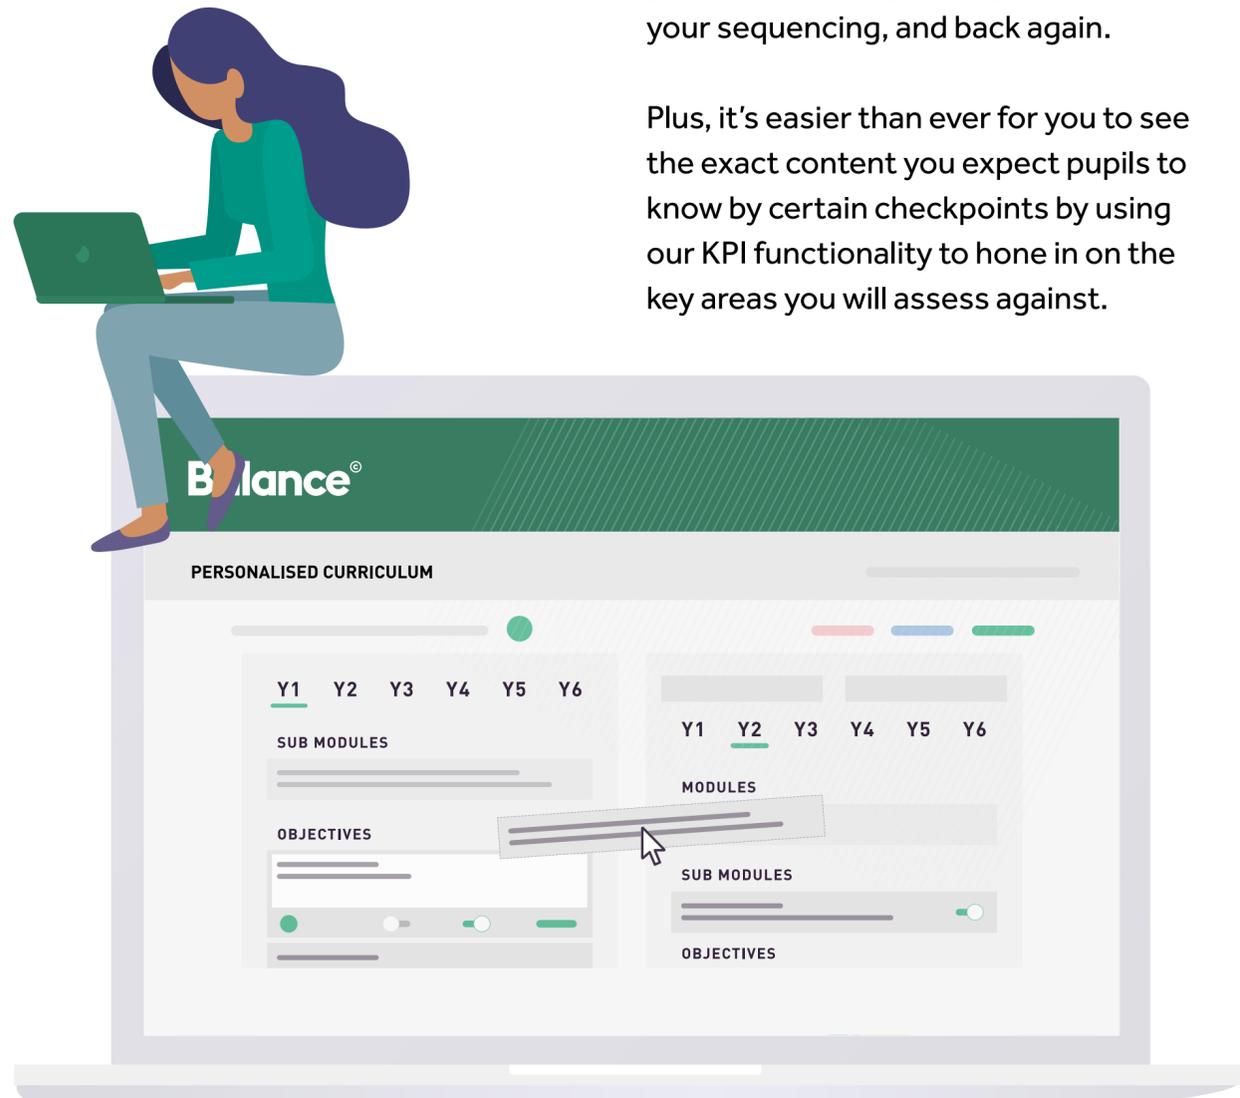

– MARY MYATT

## Your curriculum, your way.

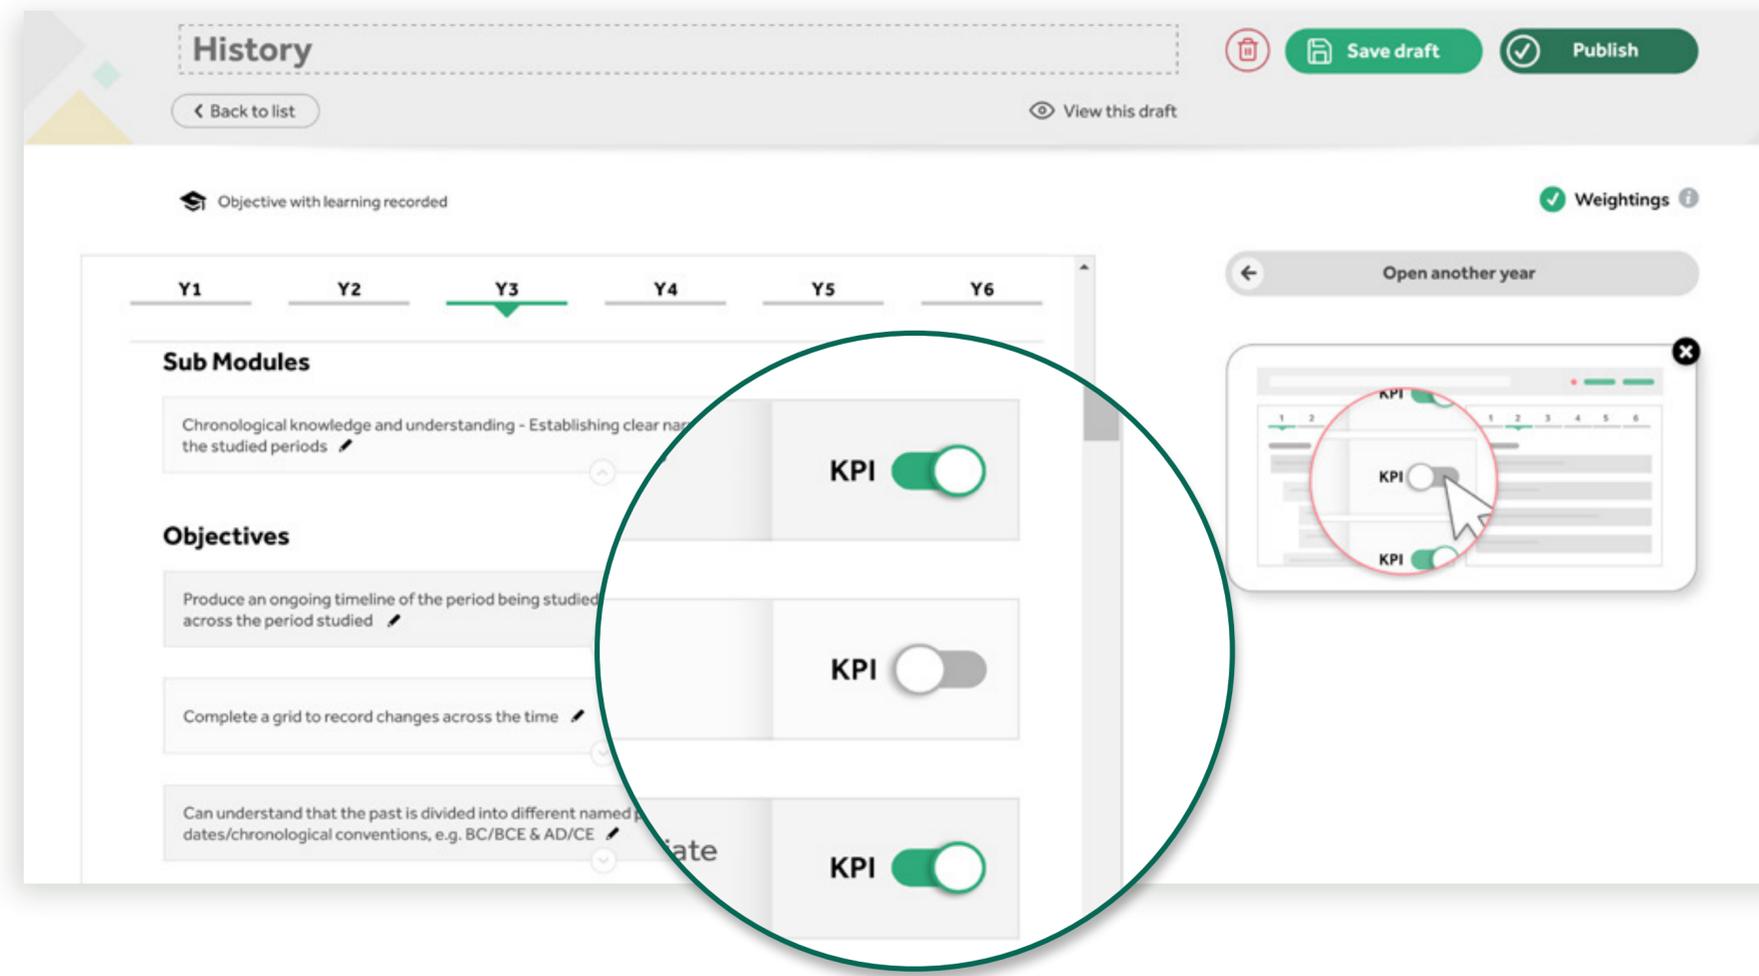

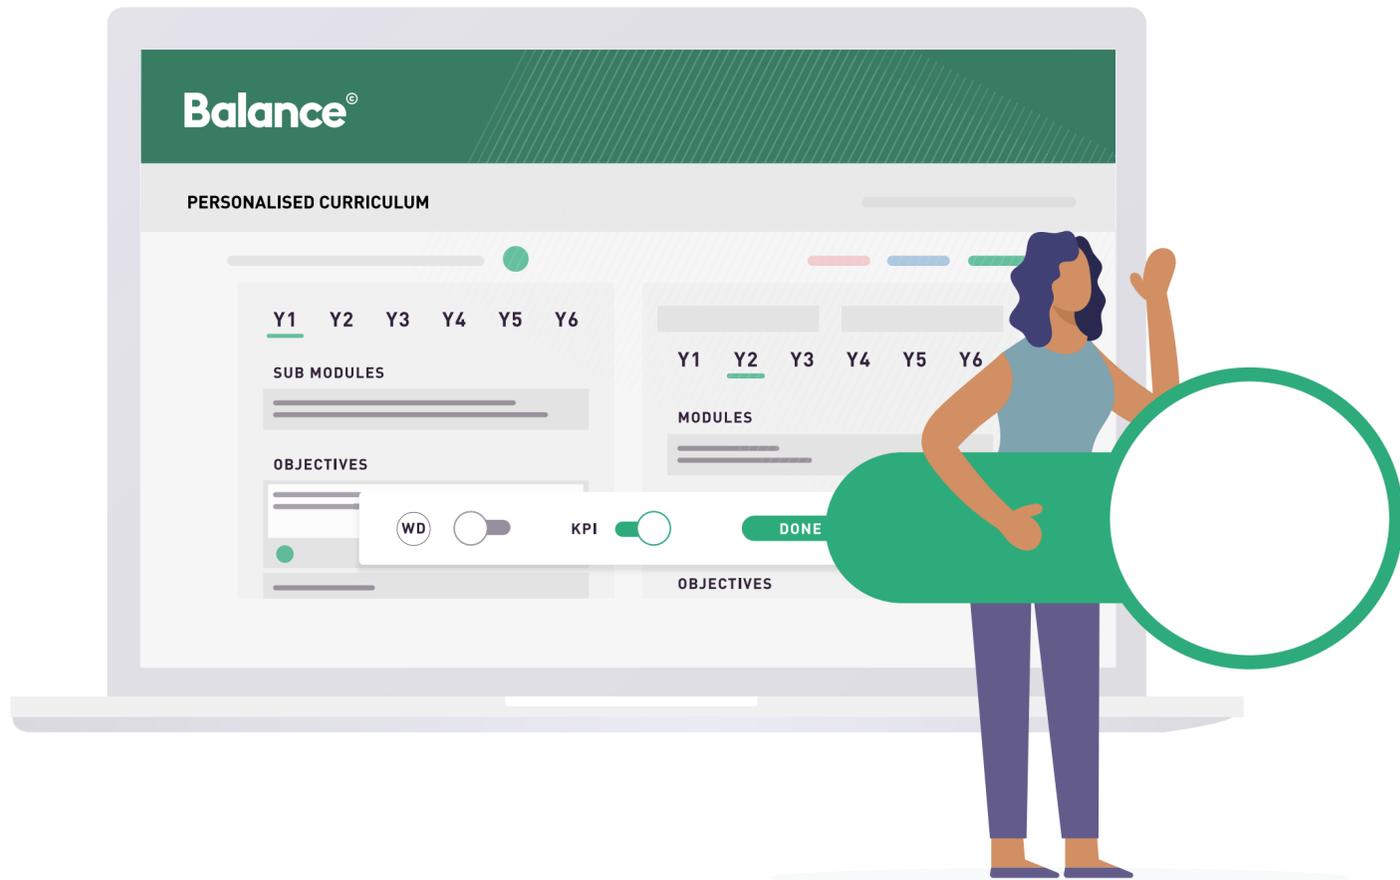

Developed by subject specialists, Balance comes pre-populated with a variety of curriculums for you to use as they are, or for you to personalise for your school.

Using a simple drag and drop method, you're able to move content from year to year based on your school's curriculum intentions. You can quickly chop and change everything – from your modules, to your objectives, to your sequencing, and back again.

Plus, it's easier than ever for you to see the exact content you expect pupils to know by certain checkpoints by using our KPI functionality to hone in on the key areas you will assess against.

- Working Deeper elements help you provide depth to the curriculum
- Expertly-curated curriculums provided for you to adopt, adapt and compare your own curriculum to
- Add, edit, delete modules and objectives to suit your school
- Change your sequencing, based on their learning

## Focus on what's important.

Balance helps you stay on track by helping to define and plan the **key** content your children need to know (some schools refer to these as KPIs).

Once you've worked out what it is you want to teach and what you want to assess against, Balance automatically shifts to focus on your key objectives, making assessments more manageable.

This reduces workloads without diluting down the curriculum... meaning teachers have more time to... well, teach.

- Working Deeper elements help you provide depth to the curriculum
- Clearly see the progression across each curriculum area
- Focus on what's important and keep assessment manageable
- Teach less, but in more depth

## Balance's paid features can significantly help you get back on track, once this is all over.

Our Professional Judgements help to reduce teacher workload with simple one-click assessments, and our new Planning tool helps you to quickly and easily set out your curriculum week by week – saving you time, and making next year that little bit easier.

**We no longer have a mad rush to input or complete data each term.  
I have not seen a teacher leave with a bag of books for ages.**

**Better still, they leave with a smile and a clear evening to spend with their families.**

– PAULA FRETWELL, ST MARGARET'S INFANTS SCHOOL
